## ***2021 viognier - santa barbara county***

### ***harvest***

- our goal with the viognier is to pick grapes when the flavors are bright and focused with notes of stone fruit, pear and pineapple – it takes a little extra hang time to get there but we have learned that viognier ultimately will – without getting too sugar ripe.
- 2021 harvest was on the later side and with nice yields. good hang time and the grapes retained their acids.
- the grapes are mostly from martian vineyard supplemented with a little estate fruit and were all picked oct 6. 2021 was a great year in the vineyards and the grapes were allowed to slowly ripen
- both vineyards are organic and biodynamic certified

### ***wine making style***

- the wine making goal for the viognier is to retain the flavors of the freshly picked fruit and not to mask it with oak or any other distractions – all natural winemaking
- we cold fermented based on native yeast at around 50 degrees for a month to retain these fruit flavors – the volatile esters that can disappear with warmer fermentations
- the wine does not go through the second (malolactic) fermentation – that way we keep the minerality as well as the crispness of the fruit in the wine
- to reduce our energy use we have replaced the electricity hungry, traditional cold stabilization with a product based on manoproteins – the results are amazing and we feel even more “green” by doing so.

### ***character***

- nose is bright, juicy, vibrant, lively, even rich.
- pops of honeysuckle, peach pie, apricot and lime sorbet with a nice coating of the mouth
- filling the palate with boss pear, more stone fruit and slate gravel
- finish is big and long with bright acidity and lingering, refreshing fruit flavors

<b>appellation</b>	santa barbara county
<b>composition</b>	100% viognier
<b>vineyard source</b>	martian (87%) and estate (13%)
<b>alcohol</b>	13.9%
<b>pH/acid</b>	3.73/5.4g
<b>barrel aging</b>	none – all stainless steel
